JARR (Job Assessment Risk Review)

Describe the task:

☒ HAZARDS identify all	In the list below circle () all applicable controls required									
☐ Foreign Body	Safety glasses with side shields	Eye wash station	Shield adjacent workers	Goggles	Face Shield	Spoggles	Other			
☐ Noise	Ear plugs	Muffs	Plugs and muffs	Signs posted	Other					
☐ Respiratory Hazard	Employee fit tested	N-95 disposable respirator	Half face respirator w/cartridge	Supplied air respirator	Ventilation	Other				
☐ Burns	Fire retardant coveralls	Hot work rated gloves	Head/neck protection	UV Protection	Arc flash equipment	Face Shield	Other			
☐ Cuts	Cut resistant gloves	Cut resistant wrist protection	Long sleeves	Cut resistant chaps	Other					
☐ Pinch Points	Hand protection	Touch free tools (ie tag lines, pliers, etc)	Body positioning	Warning signs	Other					
☐ Ergonomics	Proper work elevation	Body positioning	Task rotation	PPE (knee pads/floor mats/ anti vibe gloves)	Other					
☐ Line of Fire/struck by/impact, etc	Guards on equipment	Body positioning	Temporary guarding	Signal person	Other					
☐ Falling Material	Area below work secured with barriers & sign	Temporary protection on railings	House-keeping	Material cart w/side rails	Means of hoisting material	Tethers for tools	Pail/bag for tools/material	Overhead protection	No material stacked within 6 ft of open edge	
☐ Vibration	Low vibratory tools	Vibration resistant gloves	Employee rotation	Other						
☐ Working with hazardous substances	Employees trained in WHMIS and MSDS available	Respirators	Body/trunk protection (coveralls/apron,etc)	Hand Protection	Vapour/ fume collection	Proper Storage/ disposal of hazardous material	Other			
☐ Vehicle traffic (project and/or public right of ways)	Traffic Plan	Reflective garments	Signal person	Signage	JHA	Jersey Barriers	Radios	Hi-Vis Jumpsuit	Air Horn	Other
☐ Overexertion	Mechanical assistance	Buddy lift	Proper lifting techniques	One person lift not to exceed 40 lbs	Other					

☒ HAZARDS identify all	In the list below circle () all applicable controls required									
☐ Electrical Hazard	Signs posted	3 prong grounded cords	Ground fault circuit interrupter	Arc flash PPE	Electrical insulating gloves	Limits of approach procedure followed	Overhead wires signs posted			
☐ Live Equipment	Employees trained on lock out procedures	Isolation points identified	Supervisor locks applied	Zero energy confirmed	Individual locks/tags applied	Lock out log sheet completed	Blinds/blanks installed			
☐ Fires/explosions	Hot work permit issued	Cylinders secured upright	Combustible material removed from area	All lines drained/ purged	Trained Fire Watch assigned	Portable Fire Extinguisher at workface	Appropriate PPE (see burns)	Fire Blankets used to contain sparks		
☐ Hoisting/Rigging Failure	Competent person assigned (equipment operator/rigger)	Pre use inspection of all components	All components within load rating	Hoisting area established and signed	Tag lines	Critical lift plan prepared for lifts over 75% capacity and two crane lifts	JHA complete			
☐ Spills/Releases	Pre use inspection of all equipment/processes	Secondary containment	Spill contingency plan	Spill response equipment readily available	Employees trained on responsibilities	Fume Collection	Other			
☐ Inclement/ extreme weather	Lightning 40/30 rule	Heat stress procedures	Cold stress procedures	Monitor wind speeds (hoisting/ EWP use to cease if wind speeds exceed 45 km/hr)		Sun-screen	Other			
☐ Ice/Snow Slippery Conditions	Adequate Boot Tread	Sand Salt or Other	Boot Ice Cleats	Clear Walkways	Dry Floor	Other				
☐ Trenching/ Excavation Hazards	Sloping	Shoring	Trench box c/w drawings	Access/egress provided every 40 ft	Checklist complete (excavations deeper than 1.2 m)	Locates complete and provided to operator	Other			
☐ Access/Egress to work area/ slips/trips	Walkways maintained	Ladders/ ramps	Housekeeping	Overhead Protection	Lighting Provided	Other				
☐ Pre-Job Duties	Traffic Plan Review	Jarr Review	Locate Review	JHA Review	ERP Review	Is Third Party Required?	Other			
☐ Use of Mobile Equipment	Operator trained on operation of specific equipment in use		Pre use inspections complete	Competent signal person assigned	Traffic Plans established	Wheel Chocks On Vehicles over 4500 kgs	Other			
☐ Confined Spaces	Workers trained on Procedures/ responsibilities	Permit complete	Rescue Plan in place	All necessary equipment available	Signs posted	Means of communication available	Multiple Employer Coordination performed			
☐ Personal Protective Equipment Pre-Use Inspection Required	Hard Hat	FR Clothing	Full Body Harness	Shock Absorbing Lanyard	Retractable Lanyard	Life Line	Face Shield	Respirator		
☐ Equipment Pre-Use Inspections Required	Powered/ Hand tools	Elevating work platform	Rigging hardware	Trucks	Forklift/ Telehandler	Cranes	Scaffolds			
☐ Other										

Has full hazard assessment of work area been conducted Y N Hotlines Identified Y N ➡

☒ HAZARDS identify all	In the list below circle () all applicable controls required									
☐ Jobsite Considerations	Subcontractors	Vendors	Pedestrians	School Zone	Business District	Clients	Other			
☐ Overhead Hazards	Goal Posts	Spotter	Overhead Wire Signage Visible		Limits of Approach Sticker		Other			
☐ Welding	Flash Mitigation	FR Clothing	Weld Umbrella/ Weld Shack	Fire Watch	Weld Shield	Air Mover	Hot Work Permit			
☐ Ground Disturbance	Ground Disturbance Checklist		Swing Zone Radius Designated		Pinch Points		Blind Spots Identified			
☐ Pipe Hauling and Stringing	Utilities Supported	Air Horn	Hotlines Marked	Proper Barricade	T-Caps	Soil Type:	Other			
	JHA	Pinch Points	Tag Lines	Spotter	Overhead Hazards	Sling Inspection	Crane Inspection			
	Stakes Placed On Trailer	Rigging Adjusted to Pipe Length		Outriggers Deployed On Crane		Cargo Management		Other		
☐ Pigging	Historical Report	Environmental Controls	Black Powder	Purge Line	Fire Extinguisher	FR Clothing	Signs			
	No Entry Zone	Inspect Hoses/ Compressor	Whip Checks	Inspect Pig Catcher & Sender		LOTO	Radio	Other		
☐ Hazardous Coating Removal	Coating Identification		Type-1 Non-Friable		Fit Test		Training		Full Ty-Vek Suite	
	Wetting Agent		Disposal-Double Bagged		Nitrile Gloves		Saran Wrap		Other	
☐ Night Work	Portable Lighting		Delineator Lights		Helmet Headlights		Hi-Vis Traffic Clothing		Hi-Vis Arm and Leg Band	
☐ Subcontractors	Aecon Orientated		Hazard Assessment Complete		Aecon Sub Pre-Qualified		Other			
☐ Hydro-vacs	Chocked	Grounding Mats Used	Face Shield Worn		Boom in Cradle for Travel		Signs	Other		
☐ Drills	Directional Drill Checklist		Locate Reviewed		Utilities Exposed for Crossing		Parallel Utilities Exposed			
	Drill No Entry Zone Delineated with Sign				Other					
☐ Extra Jobsite Hazards	AC Induced Voltage		Muddy/Wet Conditions		Site Theft/Security		Aecon Emergency Board Current
